

## Qucik Report Editor - Tip #77

---

When using 4D's Quick Report Editor to display text fields, it is possible that some of the text will not be visible. This only happens in cases where the field's text exceeds the space allotted to it on a single page. Any text that does not fit on the page will not be visible. An example of this can be seen below in Figure 1.

[Commercial\_Leads]Action\_Taken

Figure 1

## Qucik Report Editor - Tip #77

---

After creating a Quick Report including only this field the print preview looked like Figure 2. Some of the text is not visible by the right margin.

**Figure 2**

Mr. Yaughty:
Regarding your inquiry last month, I have reviewed your Scooper patent and do not see practical sp

## Qucik Report Editor - Tip #77

---

To print out a report that shows all of the text from the field, 4D Write (Word Processing) can be used. Just choose the record that the report will come from and go to Insert/4D Expression... Then choose the [Commercial\_Leads] table and the Action\_Taken field. The word processing report would like the one in Figure 3 below.

Figure 3
